

Cavalry™ Extra

Nonionic Surfactant • Water Conditioner • Deposition Aid

ACTIVE INGREDIENTS

- A proprietary blend of Polyoxyethylene sorbitan monolaurate, Poly(oxy-1,2 ethanediyl), .alpha.-undecyl-.omega.-hydroxy-, Polyoxyethylenetallow amine 80%
- Constituents ineffective as an adjuvant 20%
- Total 100%

APPLICATION DIRECTIONS

- Herbicides
1-3 qt/100 gal

PACKAGE SIZE

- 2x2.5 gal
- 265 gal

FEATURES AND BENEFITS

- **Created for increased performance compared to standard systems.**
- **Increases the penetration and efficacy of tank mix.**
- **Convenient and easy to use low use rate.**

Cavalry™ Extra meets the surfactant level requirements of most active ingredient labels in the industry that require or recommend the use of a nonionic surfactant (NIS).

Cavalry Extra is a superior deposition aid and significantly improves uniform coverage, adhesion and penetration of the active ingredient through waxy or weather-hardened cuticles. Cavalry Extra is formulated with an AMSFREE water conditioner which helps to prevent the loss of active ingredient efficacy that can occur when the mixing water is mineral saturated or of unknown quality.

It is recommended for use with a broad range of crops and noncrops when tank mixing active ingredients like glyphosate, glufosinate, 2,4-D and dicamba.

A defoamer is included for easier mixing.
